

WICK INSTALLATION INSTRUCTIONS

It is very important that you have the complete service manual that came from the manufacturer with your kerosene heater. Use it any time you attempt to service your heater. We at American Wick strongly recommend that you keep your service manual in a safe place for easy access; and that you refer to it as necessary while using and servicing your kerosene heater. If you do not have the proper service manual, request replacement from the manufacturer by make and model numbers.

Refer to the "Wick Replacement" section of your kerosene heater service manual, and follow these directions to install your replacement wick.

If your service manual is NOT available, yet you choose to service your kerosene heater, EXTREME CAUTION must be taken to insure CORRECT replacement of any wick.

Following instructions from your service manual, remove the fuel tank (if removable). Remove the batteries also.

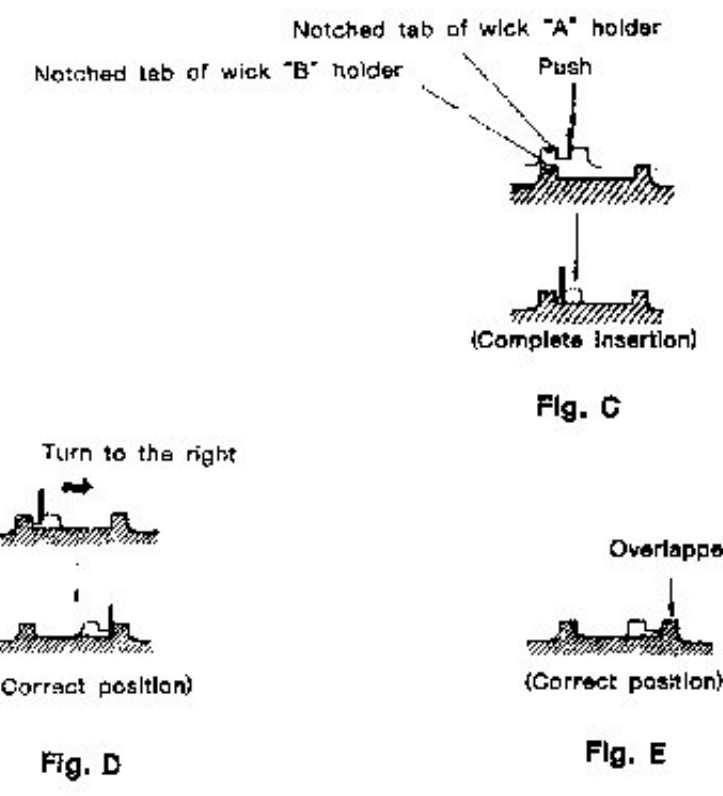

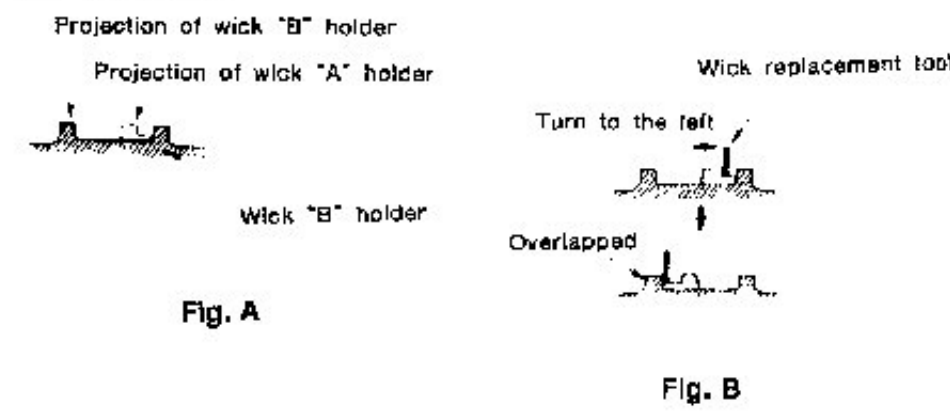

- (1) Turn the wick control knob clockwise until it stops. Check the positions of the "A" and "B" holders. See Figure A.
- (2) Insert the wick replacement tool and turn it counterclockwise to the wick removable position. (Otherwise, turn the wick replacement tool until the left projections of the wick "A" and "B" holders overlap each other.) See figure B.
- (3) Remove the old wick by holding the wick tip and pulling up.
- (4) To install the new wick, insert the wick replacement tool into the notches located on both sides of the new wick holder. Be sure to place the tabs of the wick replacement tool between the wick and the holder. The wick replacement tool may be inserted easily by gently squeezing the wick.

- (5) Insert the new wick "A" into the wick "B" holder. Align the "V" notched tabs of wick "A" holder and wick "B" holder. For ease of assembly, align the seam of wick "A" with the round projection of the wick "B" holder. After inserting new wick "A" about 1/2 inch deep push the new wick "A" holder with wick replacement tool as illustrated. See figures C and D.
- (6) Push and turn the wick "A" holder clockwise by the wick replacement tool to complete the installation as illustrated.
- (7) Check the positions of Wick "A" and "B" holders. (They should be placed in correct positions.) See figure E.

CHECK THESE ITEMS:

- * DOES THE TOP OF THE WICK EXTEND ABOVE THE WICK GUIDE EVENLY?
- * IS THE LENGTH OF THE WICK SHOWING ABOVE THE WICK GUIDE CORRECTLY? (Your manual should give you this distance.)
- * DOES THE WICK MOVE UP AND DOWN EASILY IN THE HEATER WHEN YOU TURN THE WICK ADJUSTER KNOB?
- * TRY THE SAFETY SHUT-OFF SYSTEM WHICH IS YOUR SLIDE-OVER, OR DROP-DOWN WICK EXTINGUISHING DEVICE. DO THIS AT LEAST THREE TIMES TO SEE THAT IT WORKS PROPERLY. IF NOT, YOU MUST RE-INSTALL THE WICK. DO NOT USE YOUR HEATER UNDER ANY CIRCUMSTANCE IF THE SAFETY SHUT-OFF SYSTEM DOES NOT WORK PROPERLY.
